

SK Hynix, headquartered in Icheon, Korea, is a Global semiconductor solution provider that mainly manufactures memory semiconductor products such as DRAM, NAND Flash and MCP (Multi-chip Package) with expansion into non-memory business through production of CIS (CMOS Image Sensor), etc. SK Hynix has 4 manufacturing sites located in Icheon & Cheongju in Korea, and Wuxi & Chongqing in China, runs global sales offices in 10 major countries and 4 R&D centers in Italy, United States, Taiwan and Belarus.

With the trend of IT devices getting smarter and having more enhanced mobility functions, more advanced semiconductor specifications are being required. With 30 years of expertise in semiconductor production and operation, SK Hynix is dedicated to continuous R&D and investment to achieve cost competitiveness and technological leadership in the global semiconductor market. In particular, we are focused on profit-oriented management and qualitative growth in the increasingly important markets of mobile, server and storage solutions. In preparation of the future, SK Hynix is also focused on developing next-generation memory technologies such as PC RAM, STT-MRAM and ReRAM.

The Company stock is listed on the Korea Exchange and its DR (depository receipts) is listed on the Luxembourg Stock Exchange with 1:1 ratio with original shares.

Notes: * EBITDA = Operating Profit + Depreciation & Amortization

** Cash = Cash & Cash Equivalents + Short-term Financial Instruments

*** Debt = Short-term Borrowings + Current portion of Long-term Borrowings + Debentures + Long-term Borrowings
