

Since our establishment in 1906, we have focused on "measurement" and "control" technology, delivering unique solutions to our customers. Our evolution having taken us from the idea of controlling machines to the idea of creating fulfillment for people, we now strive to realize work styles and lifestyles that give people a sense of "safety", "comfort", and "fulfillment" as well as "to contribute to benefit the global environment" in our quest for "human-centered automation." And we place great importance on the distribution of profits to our shareholders. The management would like to maintain stable dividends while striving to increase its dividends payout with the business growth.
