

We are a new-age company that tackles some of the 21st century's biggest challenges.

Presight was born in 2020 at a time of extraordinary pressures facing the nation and humanity at large. A broad spectrum of areas of the economy were suddenly confronted with previously unseen challenges for which current thinking and solutions were no match and could not provide the necessary solutions. Overcoming such hurdles requires tackling massive complexity through a trailblazing attitude.

By combining the power of big data, analytics, and AI expertise, Presight catalyzes information and generates previously-unidentified insight that enables every sector of every scale to solve today's challenges and convert them into opportunities to enable lifelong human advancement.

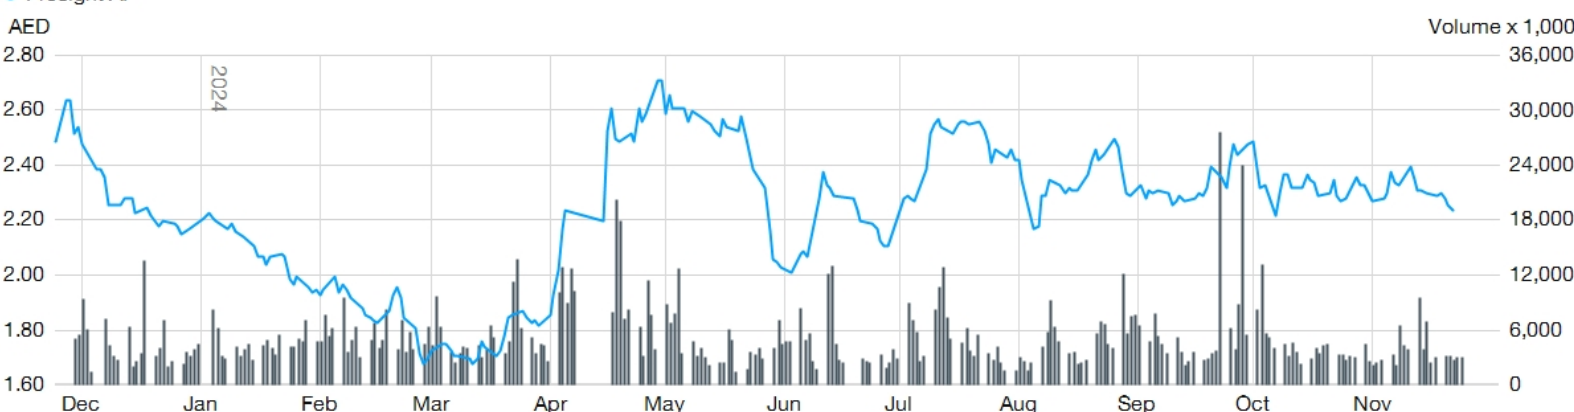

To deliver for clients across multiple sectors we focus on four core pillars with significant potential for innovative market growth:

- **PUBLIC SECTOR:** Enhancing public services and optimizing government efficiencies. We enable public agencies to improve citizen service offerings, define data-driven policies, enhance public safety, and enable digital identity management.
- **FINANCE:** Identify financial anomalies, fraud, and risk. We equip regulators and companies with the tools to detect and address financial anomalies, analyze trends, and run audits.
- **UTILITIES:** Enable efficient utilities by using big data analytics powered by AI
- **SPORTS:** Augmenting athlete performance and fan experience. We provide athletes and teams with the ability to optimize individual and team performance, forecast outcomes, identify unique talent and enhance fan experience.

By harnessing its power and rapidly growing range of capabilities, Presight equips highly-influential key decision makers with the right tools and timely information that converts them to drivers of new age solutions that create broad and far-reaching impact.

Presight is now the region's leading international big data analytics company powered by AI, with ten flagship solutions, over 100 AI models, and clients across the globe.
